DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference/abstract 63300131 ('131). '131 discloses an excavator (abstract, line 1) which inherently comprises an upper turning body mounted to a lower traveling body and an excavating device (13,14,15) attached to the turning body. Also, '131 discloses the excavator having an engine 31 as a power source, a generator 32 driven by the engine, a plurality of electric motors (34a,34e,34f) and reduction devices (35a,35e,35f) for driving both the traveling and turning bodies (abstract, lines 1-4). Further, although not specifically shown in the reference provided, such excavators inherently have batteries as electrical storage devices.

Allowable Subject Matter

Claims 3-6 and 8-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
